

For Digital Sensors

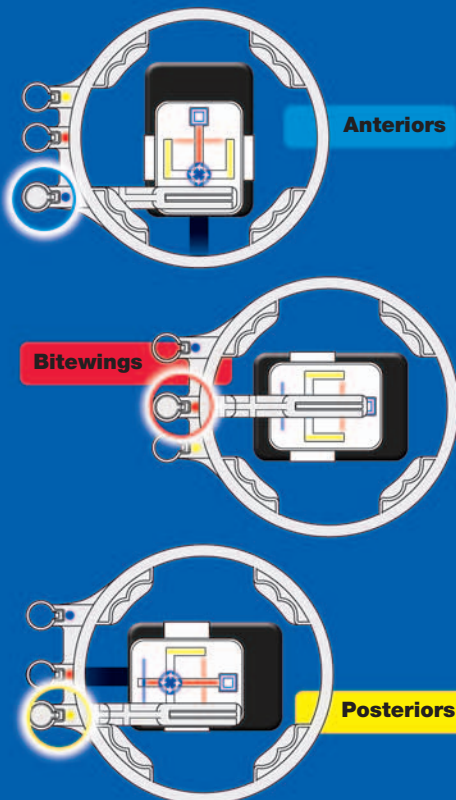

# Uni-Grip®

UNIVERSAL DISPOSABLE RADIOGRAPHY HOLDER

All you need is  
**ONE**

The Uni-Grip® holder and Uni-GripAR® positioner, with sliding bitepiece and multi-position ring, let you do an entire FMX with just one setup.

The Uni-Grip holder's bitepiece slides quickly through precision channels to accomplish the full range of intraoral x-rays. Available for digital sensors or film & phosphor plates.

**Universal** • Accommodates ANY #1 or #2 radiograph media

**Fast and Easy** • Attaches in seconds, reposition bitepiece in just a moment. Color-coded channels ensure correct positioning.

**Comfortable** • Compact size and rounded edges are easy on the patient

### Uni-GripAR Positioning Arm & Ring

Enhanced positioning for digital sensors, film and phosphor plates.

- Works with any Uni-Grip holder
- Color-coded for easy assembly
- Reusable, and fully autoclavable

Watch the Uni-Grip holder in action, and we'll send you a **FREE** sample pack, plus a Uni-GripAR positioner.

Simply visit [www.unigrip.com](http://www.unigrip.com) and watch the brief demonstration video of the Uni-Grip holder in action. At the end, just provide us with an address and we'll send a complimentary Uni-Grip holder sample pack and Uni-GripAR positioner right out to you — over a \$40 value! Limit one per office, please.
